## 2. Requests from Coastal States

## a) Northern shrimp in Subarea 1 and Div. 0A

## Advice October 2018 for 2019

## Recommendation

In line with the stated management objective of maintaining a mortality risk of no more than 35\% (subject to a risk of biomass being below Blim of less than 5\%), Scientific Council advises that catches in 2019 should not exceed 105000 t .

## Management Objectives

A management plan and management objectives have been defined by the Government of Greenland in 2018. The objective is to maintain a mortality risk of no more than 35\% (subject to a risk of biomass being below $B_{\text {lim }}$ of less than 5\%). Advice was also drafted to be consistent with the NAFO precautionary approach (FC Doc. 0412).

| Objective | Status | Comment/consideration |
| :--- | :---: | :--- |
| Apply Precautionary <br> Approach | $\bigcirc$ | Stock status is both estimated and <br> forecast relative to precautionary <br> reference points |

○ OK

## Management unit

The stock, considered distinct from all others, is distributed throughout Subarea 1, extends into Div. 0A east of $60^{\circ} 30^{\prime} \mathrm{W}$, and is assessed as a single stock.

## Stock status

Biomass at the end of 2018 is close to $B_{m s y}$ and the probability of being below $B_{l i m}$ is very low ( $<1 \%$ ). The probability of mortality in 2018 being above $Z_{m s y}$ is $36 \%$. Recruitment is close to average.

## Reference points

$B_{\text {lim }}$ has been established as $30 \% B_{m s y}$, and $Z_{m s y}$ (fishery and cod predation) has been set as the mortality reference point (FC Doc. 04-18). $B_{m s y}$ and $Z_{m s y}$ are estimated directly from the assessment model.

## Projections

Predicted probabilities of transgressing precautionary reference points in 2019 - 2021 under eight catch options and subject to predation by a cod stock with an effective biomass of 34 Kt .

| 34000 t cod Risk of: | Catch option ('000 tons) |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 80 | 85 | 90 | 95 | 100 | 105 | 110 | 115 |
| falling below $B_{\text {msy }}$ end 2019 (\%) | 30 | 30 | 31 | 32 | 33 | 33 | 33 | 34 |
| falling below $B_{\text {msy }}$ end 2020 (\%) | 30 | 30 | 30 | 33 | 34 | 35 | 35 | 37 |
| falling below $B_{\text {msy }}$ end 2021 (\%) | 29 | 29 | 31 | 34 | 34 | 36 | 37 | 38 |
| falling below $B_{l i m}$ end 2019 (\%) | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| falling below $B_{\text {lim }}$ end 2020 (\%) | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| falling below $B_{l i m}$ end 2021 (\%) | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| exceeding $\mathrm{Z}_{m s y}$ in 2019 (\%) | 13 | 17 | 21 | 26 | 30 | 35 | 40 | 44 |
| exceeding $\mathrm{Z}_{\text {msy }}$ in 2020 (\%) | 13 | 17 | 22 | 26 | 31 | 36 | 41 | 46 |
| exceeding Zmsy in 2021 (\%) | 14 | 17 | 23 | 27 | 32 | 38 | 42 | 47 |

## Assessment

Advice is based on risk analysis coming from a quantitative model. The analytical assessment was run in 2018 with revised treatment of the input data (SCR Doc.18-56, 18-60) and with updated data series.

The next assessment is scheduled for 2019.

## Human impact

Mortality related to the fishery has been documented. Other human sources (e.g. pollution, shipping, oilindustry) are considered minor.

## Biological and Environmental Interactions

Cod is an important predator on shrimps. This assessment incorporates this interaction. Other predation is likely but not explicitly considered. Shrimps might be important predators on, for example, fish eggs and larvae.
Fishery
Shrimps are caught in a directed trawl fishery. Bycatch of fish in the shrimp fishery is around $1 \%$ by weight. The fishery is regulated by TAC.

Recent catches and TACs ( t ) have been as follows:

|  | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Enacted TAC $^{1}$ | 130153 | 130153 | 139583 | 114425 | $100596^{1}$ | $97649^{1}$ | $82561^{1}$ | $96426^{1}$ | $101706^{1}$ | $114876^{1}$ |
| STATLANT 21 | 133990 | 129179 | 123195 | 114970 | 91802 | 88834 | 71777 | 82922 | 89069 | - |
| NIPAG | 135458 | 133991 | 123989 | 115977 | 95381 | 88765 | 72256 | 85527 | 89396 | $101250^{2}$ |

1 Sum of TACs autonomously set by Canada and Greenland.
${ }^{2}$ Expected to year end

## Effects of the fishery on the ecosystem

Measures to reduce effects of the fishery on the ecosystem include area closures, moving rules and gear modifications to reduce damage to benthic communities and reduce bycatch.
