

Northern shrimp

Pandalus borealis

Northern shrimp are distributed within Divisions 3LMNO and managed as two separate stocks: 3LNO and 3M. Fishing for shrimp in 3LNO has historically been confined to Div. 3L.

3LNO Division

Fishery status

A moratorium (no directed fishery) has remained in place since it was declared in 1995.

Recent assessments

No directed fishing in 2018 and 2019 as the stock is below B_{lim} with no indication of short-term recovery.

Directed fishing for Northern shrimp must follow the guidance of Article 9, NAFO Conservation and Enforcement Measures.

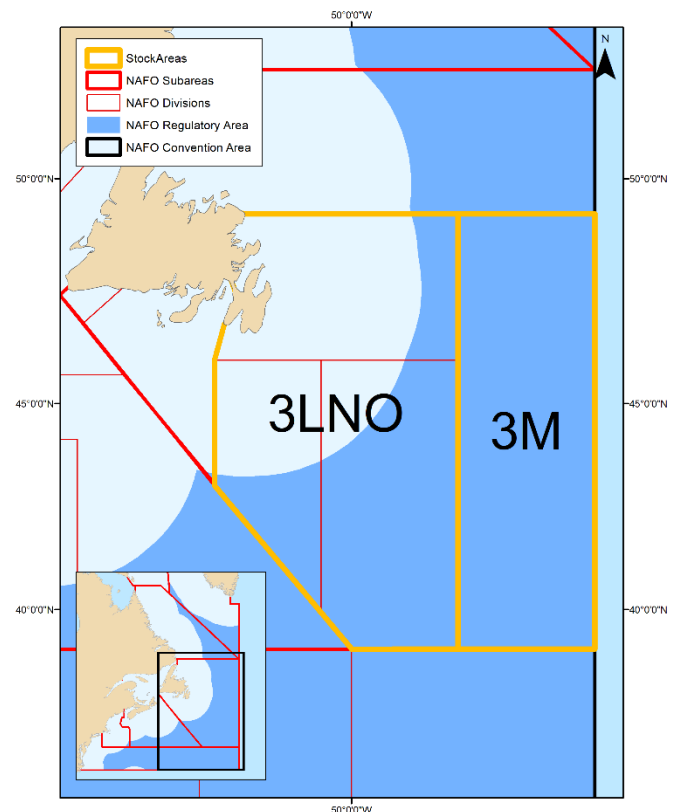

3M Division

Fishery status

A moratorium has remained in place since it was declared in 2010.

Recent assessments

Following several years of low recruitment, the spawning stock has declined, and has remained below B_{lim} since 2011. No directed fishing for 2018 and 2019 as the stock is below B_{lim} .

The orange frames indicate Divs. 3LNO and 3M Northern shrimp (PRA) management areas.
