NINTH ANNUAL MEETING - SEPTEMBER 1987

Note from the Scientific Council on Facilitation
of Technical Advice Requested from the Council

At the close of its meeting of June 1987, the Scientific Council resolved to endorse a recommendation of STACREC in the following terms:

That when the Fisheries Commission establishes Working Groups to study matters requiring scientific advice, having a representative of the Scientific Council present at meetings of such a group would be beneficial in assisting the Scientific Council to provide timely advice in response to Commission requests.
