

Serial No. N5969

NAFO/FC Doc. 11/34

33rd ANNUAL MEETING – SEPTEMBER 2011

Follow-up of editorial redrafting of the NAFO CEM by EDG

During the review of the NCEM, EDG identified several areas where further clarification and improvements may be required to support new measures, aiming at maximizing the effectiveness of the NAFO control and inspection scheme.

It is requested that the Fisheries Commission authorize STACTIC to continue the work of the EDG, with the scope to streamline the issues identified during the initial review and propose new measures to address them.
