

REPORT OF MEETING OF PANEL 2 - 4 JULY 1952

A meeting of Panel 2 was held at 4:30 p. m. on 4 July 1952. Canada, the only contracting Government on the Panel, was represented by Commissioners supported by advisers. Observers were present from France, Norway, Portugal, Spain, United Kingdom, United States and F. A. O.

Dr. Templeman's report "Canadian Groundfish Research in Subareas 3 and 2", Document XI, was deposited. It was pointed out that Canada is carrying on very limited research in Subarea 2 as compared with more intensive investigations in Subareas 3 and 4 but does not plan to neglect the study of this Subarea.

France expressed interest in this Subarea and the intention to become a member of Panel 2 after ratification of the Convention has been deposited.

Spain started to fish in this Labrador area two years ago and plans to fish there this year but will not seek membership in Panel 2 until the catch taken from this Subarea is considered to be substantial (refer Article IV 2 of the Convention).
