ANNUAL MEETING - JUNE, 1963

Comparative Groundfish And Herring Landings

From The Convention Area

For The Years 1961 And 1962

By: B. F. C. DeBaie

(Note: Since not all reports have been received for the year 1962, Denmark (F) and U.K. have been excluded for both years).

Landings In Metric Tons Round Fresh

Species	1961 (Final Figures)	1962 (Preliminary Figures)	Change
Total Groundfish Landings	1,879,878	1,803,018	- 4.9%
Cod	1,225,035	1,192,371	- 2.7%
Haddock	178,733	138,101	- 22.9%
Redfish	225,164	182,168	- 19.1%
Halibut	5,395	4,330	- 20.3%
Flounder	87,726	90,486	+ 2.3%
Other Groundfish	157,843	195,561	+ 24.0%

Landings In Metric Tons Round Fresh

Species	1961 (Final Figures)	1962 (Preliminary Figures)	Change
Herring	152,736	264,817*	+ 73.2%

* Since U. S. A. figures for Miscellaneous Gears have not been reported for the year 1962, U. S. A. Herring figures have been excluded for both years. Herring Landings for U. S. A. in 1961 amounted to 26,593 metric tons; the advanced estimate for 1962 has been set at 80,000 metric tons. If these figures were implemented into the Herring landings above, the percentage increase would then read + 93.3%.
