

INTERNATIONAL COMMISSION FOR

RESTRICTED

THE NORTHWEST ATLANTIC FISHERIES

ICNAF Res. Doc. 66-2

Serial No. 1610
(G. c.)

ANNUAL MEETING - JUNE 1966

North Atlantic Species Names

(also FAO Fisheries Circular No. 79)

NORTH ATLANTIC SPECIES NAMES

Prepared by

Current Statistics and Economic Data Section
Fishery Statistics and Economic Data Branch
Fishery Economics and Products Division
Department of Fisheries

FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS
Rome, April 1966

PREPARATION OF THIS CIRCULAR

Extract from Section 7 of the Report of the Fourth Session of the Continuing Working Party on Fishery Statistics in the North Atlantic Area (FAO Fisheries Reports, No. 21, File/R21):

The Continuing Working Party noted that all three agencies, FAO, ICES and ICNAF, have in the past few years undertaken the review, revision and publication of lists of species appearing in tables in their statistical publications. It considered a proposal by the Secretary for joint FAO/ICES/ICNAF action to issue a loose-leaf *Multilingual List of Common Names of North Atlantic Fishes, Crustaceans, Molluscs, etc.*. While several members were strongly in favour of such a publication, the Continuing Working Party recommends that further work along these lines should for the moment be suspended pending publication by OECD of the *Multilingual Nomenclature of Fish and Fishery Products*.

However, the Continuing Working Party considers it desirable to have available for fishery workers concerned with North Atlantic fisheries statistics a document in a regular series, which could be referred to in preparing notes, instructions and reports on fishery statistics concerned with these North Atlantic species. It therefore recommends that FAO should publish such a document as a *Bulletin of Fishery Statistics* in which should be tabulated the scientific, English, Spanish and French common names of all species appearing in the tables in the publications of ICES, ICNAF and FAO. It also recommends that in this publication the statistical categories be clearly defined and items such as "Various" appearing in the notes and on the STANA 1E forms should be specified to enable countries to consistently complete requests for statistics.

The Continuing Working Party recommends that, after some experience has been gained in using this FAO *Bulletin of Fishery Statistics* giving lists of names, and the OECD's *Nomenclature*, the proposals for (i) a multilingual list (as made in document STANA IV 65/6) and (ii) a multilingual "Index", be reviewed, possibly at the Fifth Session of the Continuing Working Party.

* * *

This document is issued as an FAO Fisheries Circular for distribution at the ICNAF meeting, May/June 1966, Madrid. After revision it will be issued as FAO *Bulletin of Fishery Statistics* No. 12 for distribution at the annual ICES Meeting, October 1966, Copenhagen. The Bulletin will also contain as an appendix the ICES list of names.

FAO Fisheries Circular (*FAO Fish. Circ.*)

These documents, given very restricted distribution, are mostly short notes, instructions for the completion of statistical forms and questionnaires, lists on various topics or provisional versions of documents which may eventually be issued in final form in other series.

Some circulars, presenting statistical tables with provisional data, are prepared as papers for conferences, committees, commissions, working parties; these tables may eventually be issued after revision in the "Yearbook" or "Bulletin of Fishery Statistics".
