ICES/ICNAF Salmon Doc. 71/26
(also ICNAF Res. Doc. 71/110)

ANNUAL MEETING - JUNE 1971

Canadian Tagging and Recapture Data for
Atlantic Salmon, 1959 through 1970

compiled by A. W. May
Fisheries Research Board of Canada
Biological Station, St. John's, Nfld.

Introduction

The following machine printouts are summaries of returns from juvenile and adult Atlantic salmon tagging experiments conducted by Canadian scientists during the years 1959 to 1970. This document updates and replaces earlier tabulations presented to ICNAF, the most recent of which was ICNAF Res. Doc. 70/1. All known Canadian tagging experiments during the 1959-70 period are included, whether in rivers, Canadian coastal areas or more distant marine areas. Experiments are individually numbered and arranged in chronological order for juveniles and adults separately.

Explanation of Format and Abbreviations

From extreme left of each table:

Experiment Number

5 digit code; first 2 represent year of tagging; letter A indicates juveniles, B indicates adults; last 2 digits are consecutive numbers for each year.

Date

Month in which experiment was begun is printed (3 letters), followed by a number representing the duration of the experiment, e.g. MAY2 indicates that the tagging started in May and continued through part or all of June.

Stage

One or two letter code. SN = smolts, native; SH = smolts, hatchery; SM = smolts, mixed. Similarly, PN, PH and PM for parr; S = salmon (2 sea year), A = mixed adults, G = grilse, K = kelts, L = large salmon (3 sea year).

Identification

Alphabetic information on tag releases, e.g. area, type of tag, agency, etc. FRB = Fisheries Research Board of Canada; RDB = Resource Development Branch, Canadian Fisheries Service.

Tag Return Data

NO = number tagged
YR = year of return. Note that returns of smolts in the year of tagging are not included. 1 = returns in first year after tagging, 2 = returns in second year, etc.; 9 = year of return not known.
WG = West Greenland returns
D = Distant returns (outside immediate area of home river)
H = Home waters returns
A = Angling returns
CF = Counting Fence Returns
NK = Area of capture not known
T = Total returns, exclusive of Greenland
GT = Grand total of returns

Note that returns in the year of tagging (year 0) are included for the adult tagging experiments (B series).

Agencies Reporting Data

Summaries of returns from individual tagging experiments, included in the following list, have been received from the agencies listed below.

Fisheries Research Board of Canada,
Biological Station, St. Andrews, N.B.

Fisheries Research Board of Canada,
Biological Station, St. John's, Nfld.

Resource Development Branch, Maritimes Region,
Canadian Fisheries Service.

Resource Development Branch, Newfoundland Region,
Canadian Fisheries Service.

Quebec Dept. of Tourism, Fish and Game.
