ICNAF Comm.Doc. 73/11

ANNUAL MEETING - JUNE 1973

Danish proposal concerning conservation measures
by quota regulation for cod stocks in Subarea 1

The 1972 ICNAF Annual Meeting agreed that Panel 1 at the next Annual Meeting should consider fully the need for catch quota or other additional regulatory measures for cod in Subarea 1, in the light of the latest scientific information and of the regulations agreed at the 1972 Annual Meeting for other fisheries.

Denmark proposes that the 1973 Meeting agree upon a catch quota regulation in Subarea 1, partly because of the decline of cod catches in the recent years, partly because of the opportunity of diversion of fishing effort to Subarea 1 from other Subareas where catch quotas are established, and thereby increase the fishing interests on the already fully exploited cod stocks there.

During the Meeting it will be stated by Denmark that special regard must be paid to the Greenland fisheries. It is hereby recalled that Greenland besides being the only coastal territory in the Subarea is a geographically isolated developing area whose fishery is a *conditio sine qua non* for its economy.
