ICNAF Comm.Doc. 74/17

ANNUAL MEETING - JUNE 1974

Canadian proposal regarding monthly reporting of catches of  
species under quota control in the Convention Area

To develop mutual confidence in the ICNAF quota regulation system and to facilitate the planning of enforcement activities of all countries, Canada proposes that each Member Country be required, within 14 days after the completion of each month, to provide the Executive Secretary with information on the catch of each stock under quota regulation by that country during the preceding month and that this information be distributed to all Member Countries as soon as possible after receipt.
