ANNUAL MEETING - JUNE 1976

United States Proposal for National Allocations
of Herring in Division 5Z and Statistical Area 6
as per Proposal (5) adopted in Plenary Session
on 26 January 1976, Rome, Italy.

The United States was pleased to present a proposal for allocation of herring in Div. 5Z and Statistical Area 6 by indicating the requirements of the coastal states and prorating the remainder based on the allocations established for the first half of 1976. This allocation was presented in Comm.Doc. 76/VI/43. Subsequently the delegate from Poland suggested an allocation of the remainder based on a proportionality of historic catch.

After reviewing historic catch patterns, and taking into account the needs of all countries utilizing herring from Div. 5Z and Statistical Area 6, the United States is pleased to present an alternate proposal of allocation for consideration by the Panel.
