the Northwest Atlantic Fisheries

Serial No. 3774
(G.a.)

ICNAF Summ. Doc. 76/VI/11

ANNUAL MEETING - JUNE 1976

Nominal Catches of Finfish species and squids
in Subarea 5 and Statistical Area 6, 1965-74

by

Assistant Executive Secretary

ICNAF Summ. Doc. 75/10 contained tabulations of nominal catches of species individually regulated as well as the catches of all other finfish species and squids in Subarea 5 and Statistical Area 6, except for those species specifically named in the conservation proposal as exclusions, namely menhaden, tunas, billfishes and large sharks.

Every effort has now been made to update the material contained in Summ. Doc. 75/10, taking into account all of the revisions to date published previously in *Statistical Bulletin*, Vol. 15-24. In cases where it was necessary to determine the catches of "Non-members", as reported in earlier issues of *Statistical Bulletin*, the STATLANT 21A and 21B returns were consulted. Japanese data for 1967-69 are revised data from Summ. Doc. 76/VI/9, which give a more refined breakdown of catches by divisions than previously given in *Statistical Bulletin*, Vol. 22. Spanish squid catches (by species) for 1960-73 were taken from Working Paper No. 3 from the November 1974 Special Commission Meeting, and these are considered to reflect the Spanish squid catches more accurately than data reported in the *Statistical Bulletin*. In some years the USSR catches of large sharks and dogfishes were not given separately in the reported statistics but listed as "Sharks"; since USSR scientists have indicated that these catches consist mostly of dogfishes (as opposed to large sharks), these catches have been considered to be dogfishes and are thus included as "Dogfish(NS)" and also in the "Other finfish" and "All finfish plus squids" categories. Also, the catches of Atlantic sauries, which were inadvertently excluded from the data given in Summ. Doc. 75/10, are now included.

The squid catches (page 9) continue to be listed in the categories "Squid-*Illex*", "Squid-*Loligo*", and "Squid(NS)". An attempt is being made to obtain from member countries a breakdown of "Squid(NS)" catches by species. It is hoped that all countries will report their catches by species in time for revisions to be issued during the April 1976 Meeting of the Assessments Subcommittee.
