ICNAF Summ. Doc. 77/VI/3

Supplement to Statistical Bulletin, Vol. 25: Detailed
Catch and Effort Statistics for Ireland

by

Assistant Executive Secretary

The various tables of Statistical Bulletin Vol. 25 for the year 1975 contain nominal catch statistics for Ireland, which were assigned to "Div. 6NK", as no breakdown of the catches by division or subarea was provided in the STATLANT 21A report, but the distribution of species taken suggested that the catches probably came from the southern part of the ICNAF Area.

Following the publication of Vol. 25, more detailed catch and effort statistics were received from Ireland on form STATLANT 21B, and these are listed in the following tables. All catches were taken with bottom otter trawl (OTB-2) by vessel tonnage class 6 (1000-1999 GRT), and the "main species sought" was indicated as squid. In Table 2, the abbreviations for the effort measures HF, DF and DG refer to "hours fished", "days fished" and "days on grounds" respectively.

Table 1. Ireland: nominal catches for 1975 by species and division.
