Provisional Index and List of Titles for ICNAF Publications
and Meeting Documents, 1976

Compiled by

V. M. Hodder

1. Introduction

Special Publication No. 11, issued in June 1975, contained an index and list of titles for ICNAF publications (Annual Proceedings, Research Bulletin, Redbook and Special Publications) for the period 1950-74. The compilation of a similar index for meeting documents issued during 1950-74 is well advanced and its completion is anticipated late in 1978 or early 1979. In the meantime, the Secretariat plans to issue annually a provisional index and list of titles of all ICNAF publications and meeting documents, with the proposal that these be collated and published at 5-year intervals. This index covering all ICNAF publications and meeting documents issued in 1976 is presented as an example of the format proposed for the annual index.

2. ICNAF Publications in 1976

The following is a list of publications in 1976, the abbreviation preceding the name of each publication representing the code used in indexing:

- a) AR *Annual Report* Vol. 25 for 1974/75 (Issued April 1976)
- b) MP *Meeting Proceedings* for 1975/76 (Issued October 1976)
- c) R *Redbook* 1976 (Issued August 1976)
- d) RB *Research Bulletin* No. 12 (Issued October 1976)
- e) SE *Selected Papers* No. 1 (Issued February 1976)
- f) SP *Special Publication* No. 9 (Issued February 1976)
- g) SB *Statistical Bulletin* Vol. 24 for 1974 (Issued January 1976)
- h) SY *Sampling Yearbook* Vol. 19 for 1974 (Issued February 1976)
- i) FV *List of Fishing Vessels* for 1974 (Issued February 1976)
- j) CD *Commissioners' Documents* (76/I/1 to 76/XII/84)
- k) RD *Research Documents* (76/I/1 to 76/XII/173)
- l) SD *Summary Documents* (76/I/1 to 76/XII/48)

In the preparation of the material for this index, emphasis was placed on the indexing of Scientific papers, particularly those published in the Research Bulletin, Selected Papers and Special Publication series, and those issued as Research Documents and also Summary Documents, where appropriate. In the case of Commissioners' Documents, except for a few originating from the ICNAF Secretariat, most lack specific authorship in that they were presented by delegates of the various countries. Such documents are referenced only in the "Author Index" under the heading "ANON.", followed by the name of the country whose delegation was responsible for presenting the document. The remaining publications (Annual Report, Meeting Proceedings, Redbook, Statistical Bulletin, Sampling Yearbook and List of Fishing Vessels) are indexed by subject under one or two appropriate headings only, as a detailed indexing by subject (e.g. names of species, areas, etc.) would have involved a great deal of repetition.

In the case of meeting documents listed by author and title in the "List of Titles" section, those indicated by asterisks (*) preceding the authorship are indexed by subject and author with reference to the actual publication noted in parentheses and not as meeting documents.

3. Format Used in Subject and Author Index

The compilation of this index for 1976 publication generally follows the procedure used in compiling the index for 1950-74 publications (see *ICNAF Spec. Publ.* No. 11). Each of the publications is identified by a 2-character alpha code (see abbreviations below), followed by arabic numerals to designate the actual volume number, issue number or year of issue. The numerals following a colon (:) represents the first page number for the referenced paper, whereas the numerals following an oblique (/) for all meeting documents represents the designated document number. This is followed in parentheses

* Executive Secretary, ICNAF, P. O. Box 638, Dartmouth, Nova Scotia, Canada B2Y 3Y9

by a shortened version of the title or an expression which indicates to the reader the object of the paper referenced. For brevity, many ungrammatical expressions are used, some of which require the subject headings to be read into them in order for the expression to make sense. Examples of references with their descriptive expressions are as follows:

AR 25 : 7 (administrative report for 1974/75)
FV(74): 1 (list of fishing vessels for 1974)
