Introduction

The Scientific Council has agreed that research documents (SCR) and summary documents (SCS) should be indexed on an annual basis and that these provisional indexes be combined for publication at 5-year intervals. The first NAFO issue of Index of Meeting Documents for 1979-84 was published in March 1985, the second for 1985-89 was published in February 1991, the third for 1990-94 in November 1995 and the fourth for 1995-99 was published in December 2000. This compilation relates to all SCR documents (Doc. No. 1-88) and SCS documents (Doc. No. 1-28) for the calendar year 2000.

The list of SCR and SCS documents of 2000 in the first section of this document maintains the previous format and is arranged by consecutive document number.

Compilation of the 2000 author index generally follows guidelines that were used in preparing the Index of Meeting Documents for 1979-84, 1985-89, 1990-94 and 1995-99. Each of the research and summary documents is identified by its 3-character code (i.e. SCR or SCS), followed by the last two digits of the year of issue, an oblique (/), and then the designated document number. This is followed in parentheses by a shortened version of the title or an expression which indicates the object of the referenced paper.

The 2000 subject index follows the same format as the author index. However, it differs from subject indexes prior to 1988 in that the text between parentheses is not altered from that used in the author index.
