Fisheries Organization

NAFO SCS Doc. 03/20

**SCIENTIFIC COUNCIL MEETING - SEPTEMBER 2003**

Available Data from the Commercial Fisheries Related to Stock Assessment (2002)

and

Inventory of Biological Surveys Conducted in the NAFO Area in 2002

and

Biological Surveys Planned for 2003 and Early-2004

At its meetings in June 2002 and 2003, the Scientific Council (STACREC) agreed that three Tables which are usually compiled and presented as Tables 3, 4 and 5 in the STACREC report are important and need to be completed with information from all Scientific Council sources. Accordingly, STACREC in June 2002 recommended that *in future years the Secretariat compile the reports of research activities as a working document for the June Meeting, and that it then be presented to STACREC as a SCS document at its September Meeting.*

The attached Tables were drafted during the June 2003 SC Meeting and updated/corrected through correspondence during the summer, and finalized during the September 2003 Meeting.

Available data from the commercial fisheries related to stock assessment (2002). (+ is data available).

Biological Sampling
