

CORRIGENDADocument IX p.9

1951 Total All Subareas in M. Tons Round Fresh - 15,007¹⁰⁶

Document XVMinutes of Fourth Session p. 1 and p. 2

On the basis of these new results a somewhat larger mesh than 4½ inches would be necessary in order to release 50% of the 40 cm. haddock.

The principal potential predator mentioned in that area (Merluccius)

Document XVIISecond Plenary Session p. 3

Mr. Eggerz proposed that someone from United States and Canada should be on the Committee.

Document XVIII

16. That the Commission consider the seven questions listed in the attached report of a special Sub-Committee which met at 9.30 a.m., July 7, as an indication of the lines along which the Commission's program of research might be developed.

Report by the Sub-Committee
on Division of Commission Sub-Areas
 pp. 1 + 2.

Mr. Espada

Hydrographic Sub-Committee
Minutes of First Session p. 3

A section across Fylla

Document XX p. 3

Mr. F. Heward Bell

Minutes of First Session p. 3

Mr. Dobson indicated he would be quite willing to represent this Commission. It was, however, the consensus of opinion that the Secretariat should also be represented,
