

Serial No. 456Document No. 15ANNUAL MEETING - MAY 1957UNITED KINGDOM RESEARCH REPORT FOR 1956

By R.G.R. Wall

Landings and effort for the various subdivisions worked by English trawlers in respect of cod and all species are shown below:

	<u>Voyages</u>	<u>Hours Fishing</u>	<u>Cod metric tons</u>	<u>All Fish metric tons</u>
Subarea 1				
Subdivision F	11	889	1335.79	1390.40
Subarea 3				
Subdivision P	1	951	+126.85	+534.92
Subdivision N	1	1080	+294.33	+456.43

+ As landed. The cod would be fillets and therefore from 1/3 to 1/2 of the fresh round weight.

986 cod length measurements are available from Subarea 1, Subdivision F. They are given below as in length-groups, raised numbers to landings and as percentages.

<u>Length group</u> (cm.)	<u>Raised Numbers</u>	<u>%</u>
45-49	1,896	0.3
50-54	28,494	4.9
55-59	110,945	19.1
60-64	133,376	23.0
65-69	112,832	19.5
70-74	102,456	17.7
75-79	24,014	4.1
80-84	28,731	4.9
85-89	20,136	3.5
90-94	9,286	1.6
95-99	5,717	1.0
100-104	962	0.2
105-109	407	0.1
110-114	+	0.1
115-119	604	0.1
120-124	23	0.0
125-129	46	0.0

No otolith readings were carried out on material from the Commission's area in 1956, but observation is being maintained on fish stocks, particularly halibut stocks, in the waters to the north-east of the Commission's area and it is likely that work in these waters will be intensified during 1957.

Cod. Subdivision 1F.
Length distribution in %.
