Document No.25

ANNUAL MEETING - JUNE 1958

Summary of the 1957 Statistics on the Fishery in the Convention Area

by R.S. Keir

As usual at this time, the statistics are partially incomplete and subject to revision. At the time of writing no data had been received on the Faroese fishery and last year's data have been used for this fishery to enable realistic totals to be made. No data have been received on the Italian fishery in the Convention Area and as no information was available on the fishery in 1954, 1955 nor 1956, no estimate has been included in the totals.

The weights are given in metric tons round fresh, conversions being made with the same factors as last year, which can be found in ICNAF Statistical Bulletin Vol. 5.

Summary of 1957 Groundfish Landings

	- Subarea -					Total
	1	2	3	4	5	
Cod	267,773	32,296	427,564	187,945	12,975	928,834
