

ANNUAL MEETING - JUNE 1965

French Research Report, 1964

by R. H. Letaconnoux

Work carried out in 1964

In 1964 the study of data gathered by France during the operation NORWESTLANT I was accomplished and the documents forwarded to the rapporteurs appointed at Hamburg.

Fishing trials, with trawls of large vertical mouth were made at the first of the year on board COLONEL PLEVEN II. They gave good results on the detection of cod slightly separated from the bottom, and will be continued in 1965.

Programme 1965

Fishing trials with semi-pelagic trawls in the region of Labrador.
