

International Commission for

the Northwest Atlantic Fisheries

Serial No. 3282
(G.a.)ICNAF Summ.Doc. 74/25
(Revised)

ANNUAL MEETING - JUNE 1974

Historical records (1963-72) of nominal catches for species to be considered
for regulation at the 1974 Annual Meeting

by

Assistant Executive Secretary
ICNAF

The following stock tables are derived from the most recent information available at the Secretariat. ICNAF Statistical Bulletins were the primary sources of statistical data, but all known revisions have been incorporated. Appropriate footnotes to the individual tables cover situations in which catches were not reported by divisions or subdivisions. The recent receipt of species breakdowns of Flounders (NS) from Canadian, Polish and USSR scientists (mostly for the years 1963-69) facilitated the preparation of tables for these species. All nominal catches are in metric tons round fresh weight.
