

International Commission for

the Northwest Atlantic Fisheries

Serial No. 3683  
(A.c.4)

ICNAF Comm.Doc. 75/IX/43

SEVENTH SPECIAL COMMISSION MEETING - SEPTEMBER 1975

Status of the provisional monthly catch reporting  
system for January to June 1975

by Assistant Executive Secretary

1. In accordance with a resolution adopted by the Commission on 14 June 1974 (June 1974 Meeting Proceedings No. 20, Appendix I, page 238), Member Countries are required from 1 January 1975 to report to the Secretariat on prescribed forms their provisional monthly catches by species and stock areas, whether or not the Countries have catch quota allocations for the stocks from which the catches are obtained. The monthly report is required to be forwarded to the Secretariat within 30 days following the calendar month in which the catches were made, and the Secretariat is required to collate the information received and circulate it to Member Countries within 10 days following the monthly deadline for receipt of the data.

2. Circular Letter 75/4 (10 January 1975) reminded Member Countries of the above-mentioned resolution and supplies of the prescribed form were provided for use by countries in reporting their provisional monthly catches. Additional supplies of the form (slightly revised to allow for the reporting of capelin by Div. 3L, Div. 3NO and Subdiv. 3Ps separately) were distributed with Circular Letter 75/32 (29 April 1975). Circular Letters containing the provisional monthly catch statistics for 1975 have been issued periodically as follows:

January	Circular Letter 75/21	19 March 1975
	" " 75/21 (Addendum)	1 April 1975
February	Circular Letter 75/26	22 April 1975
March	Circular Letter 75/35	16 May 1975
April	Circular Letter 75/36	12 June 1975
	" " 75/36 (Revised)	14 July 1975
May	Circular Letter 75/39	15 July 1975
June	Circular Letter 75/49	15 August 1975

3. The provisional monthly catch statistics reported by Member Countries for the period January to June 1975 are listed in Tables 1 to 17. The last column in the tables contains the reported total catches for the 6-month period, and the second last column gives the totals of the monthly catches as listed. Discrepancies between these two columns are undoubtedly due to national updating of the "year to date" totals.

4. A review of the status of the monthly reporting system for the first half of 1975 indicates the following deficiencies:

- a) Denmark: catches are incomplete for June, as no report has been received from Denmark (Faroes).
- b) France: no reports have been received for April, May and June.
- c) Iceland: no monthly reports have been received, except a letter indicating no fishing activity up to May, and a cable giving the capelin catch in Div. 3NO up to 3 July 1975.
- d) Romania: irregular reports by cable indicated that there was no fishing activity during the 6-month period.
- e) United Kingdom: irregular reports indicated no fishing activity during January to May, and no report received for June.
- f) Bulgaria: telex reports for January to June do not give breakdown by stock areas for silver hake, red hake and herring in Subarea 5 and Statistical Area 6.
- g) Some countries, reporting capelin catches in Subarea 3, are not using the revised form (issued April 1975) to list the catches separately for Div. 3L, Div. 3NO and Subdiv. 3Ps.

<sup>1</sup> 4T(Jan-Dec) + 4Vn(Jan-Apr).

<sup>2</sup> 4Vn(May-Dec).

<sup>3</sup> That part of Div. 4X south and east of lines joining the coordinates: 44°20'N, 63°20'W; 43°00'N, 65°40'W; 43°00'N, 67°40'W.

<sup>4</sup> American plaice, wltch and yellowtail combined.

<sup>5</sup> All flounders, except yellowtail.

<sup>6</sup> New Statistical Area "zero" (Baffin Island area).

<sup>7</sup> 4W(a) is that part of Div. 4W north of 44°52'N.

<sup>8</sup> 4W(b) is that part of Div. 4W south of 44°52'N

<sup>9</sup> Species other than regulated species and menhaden, billfishes, tunas, and sharks (except dogfish).

<sup>10</sup> All finfish species except menhaden, billfishes, tunas, and sharks (except dogfish), and squids.
