ANNUAL MEETING - JUNE 1978

Provisional Nominal Catches in the Northwest Atlantic, 1977

by

Assistant Executive Secretary

1. Provisional nominal catch statistics (revised) have been prepared from the STATLANT 21A submissions of 15 of the 17 member countries of the Commission and from the USA. Iceland reported no fishing activity in the Northwest Atlantic in 1977, and data for Italy were obtained from advance preliminary statistics submitted earlier in the year for the April 1978 Meeting of the Assessments Subcommittee. Although the deadline for the submission of these statistics was 15 April 1978, the STATLANT 21A reports for several countries were not received until late May after the 1978 Annual Meeting was in progress, thus preventing the computer compilation of the data for distribution in advance of the Meeting.
2. The following tabulations give the 1977 catches in the formats of Tables 1, 2 and 3 of Statistical Bulletin. In the case of USSR catches of sharks (on STATLANT 21A), these have been included in the tables as "dogfish", as has been the recent custom based on the advice of USSR scientists.
3. The nominal catches (metric tons, round fresh weight) for 1977 in the following tables represent the most up-to-date information available at present, pending the receipt of more detailed information on STATLANT 21B forms for publication in *Statistical Bulletin* Vol. 27, to be issued in late 1978.
4. At its Special Meeting in November 1977, STACRES agreed to the extension of Statistical Area 0 northward to 78°10'N, with the extended area becoming Div. OA, and the previous Statistical Area 0 becoming Div. OB, and recommended that countries report their 1977 statistics by these divisions. The nominal catches recorded in Table 4 for the new Statistical Area 0 show the breakdown of catches by the new divisions. These data are compiled in Tables 1, 2 and 3 under Statistical Area 0.
