ICNAF Sum. Doc. 78/VI/33

Provisional Index and List of Titles for ICNAF Publications and Meeting Documents, 1975

Compiled by

V. M. Hodder

Assistant Executive Secretary

1. Introduction

*Special Publication* No. 11, issued in June 1975, contained an index and list of titles for ICNAF publications (Annual Proceedings, Research Bulletin, Redbook and Special Publications) for the period 1950-74. The compilation of a similar index for meeting documents issued during 1950-74 is well advanced and its completion is anticipated late in 1978 or early 1979. In the meantime, the Secretariat plans to issue annually in a summary document a provisional index and list of titles of all ICNAF publications and meeting documents, with the proposal that these be collected and published at 5-year intervals.

2. ICNAF Publications in 1976

The index and list of titles of ICNAF publications and meeting documents in 1976 is presented in *Sum. Doc. 78/VI/18* (Hodder, MS 1978).

3. ICNAF Publications in 1975

The following is a list of publications in 1975, the abbreviation preceding the name of each publication series representing the code used in the indexing:

- a) MP(75) *Meeting proceedings* for 1974/75 (Issued November 1975)
- b) R (75) *Redbook* 1975 (Issued August 1975)
- c) RB 11 *Research Bulletin* No. 11 (Issued November 1975)
- d) SP 10 *Special Publication* No. 10 (Issued November 1975)
- e) SP 11 *Special Publication* No. 11 (Issued June 1975)
- f) SB 23 *Statistical Bulletin* Vol. 23 for 1973 (Issued January 1975)
- g) SY 18 *Sampling Yearbook* Vol. 18 for 1973 (Issued February 1975)
- h) CD 75 *Commissioners' Documents* (75/1 to 75/50)
- i) RD 75 *Research Documents* (75/1 to 75/151)
- j) SD 75 *Summary Documents* (75/1 to 75/47)

In the preparation of the material for this index, emphasis was placed on the indexing of scientific papers, particularly those published in the Research Bulletin and Special Publications, and those issued as Research Documents and Summary Documents, where appropriate. In the case of Commissioners' Documents, except for a few originating from the ICNAF Secretariat, most lack specific authorship in that they were presented by delegations of the various countries. Such documents are referenced only in the "Author Index" under the heading "ANON.", followed by the name of the country whose delegation was responsible for presenting the document. The remaining publications (Meeting Proceedings, Redbook, Statistical Bulletin and Sampling Yearbook) are indexed by subject under one or two appropriate headings only, as a detailed indexing by subject (e.g. names of species, area, etc.) would have involved a great deal of repetition.

In the case of meeting documents listed by author and title in the "List of Titles" section, those indicated by asterisks (\*) preceding the authorship are not indexed by subject and author in this "Index" but rather in the index appropriate to the actual publication noted in parentheses following the title of the paper.

4. Format Used in Subject and Author Index

The compilation of this index of 1975 publications generally follows the procedure used in compiling the index for 1950-74 publications (Hodder, 1975). Each of the publications is identified by a 2-

\*Executive Secretary, ICNAF, P. O. Box 638, Dartmouth, Nova Scotia, Canada B2Y 3Y9

character alpha code followed by arabic numerals to designate the actual volume number, issue number or year of issue (see 3 above). The numerals following a colon (:) represent the first page number for the referenced paper, whereas the numerals following an oblique (/) for all meeting documents represent the designated document number. This is followed in parentheses by a shortened version of the title or an expression which indicates to the reader the object of the paper referenced. For brevity, many ungrammatical expressions are used, some of which require the subject headings to be read into them in order for the expression to make sense. Examples of references with their descriptive expressions are as follows:

- MP(75): 5 (proceedings of 5th Special Meeting, Nov 1974)
- R (75): 23 (report of assessments subcommittee, Jun 1975)
- RB 11 : 37 (maturity and reproduction of hooded seals)
- SP 10 : 79 (international ice patrol operations, 1972)
- SY 18 : 1 (list of sampling data for 1973)
- SB 23 : 1 (fishery statistics for 1973)
- CD 75 / 6 (1975 fishery regulations as on 10 Feb 1975)
- RD 75 / 5 (predation of cod on capelin in SA 2 and 3)
- SD 75 / 12 (Japanese research report for 1974)

5. Abbreviations Used in Indexing
